

You have configured `ServerName` in the config file of your server as shown in the figure below.

```
Listen 2345
CacheSize 8096
<VirtualHost *:2345>
    DocumentRoot /home/zzh/MyServer
    ServerName zzh
</VirtualHost>
```

You should add the `<127.0.0.1, ServerName>` to the `/etc/hosts` as shown in the figures below.

`/etc/hosts`

```
127.0.0.1 localhost
127.0.1.1 liluo-PowerEdge-R740
127.0.0.1 ApacheServer
127.0.0.1 zzh
```
